

HAF 604 certification's extension

THERMOCOAX is serving the civil nuclear Chinese market for more than 20 years as an authorized exporter for safety related components for nuclear power plant.

We are proud to announce that our HAF 604 certification has been extended by the National Nuclear Safety Administration (NNSA) of People’s Republic of China) till 2022.

This certification initially issued in 2011 has been extended to additional product categories so that THERMOCOAX can now cover a wide range of I&C solutions in term of design and manufacturing of safety related CABLING and SENSORS for InCore and ExCore application.

THERMOCOAX will strengthen its position by providing more cabling for new reactor type like HUALONG, EPR or upgrade solutions for Gen 2 Nuclear Power plant.
