Project Manager

Job Title: Engineering Project Manager / Location: SAINT GEORGES (61).

Situation No.: 16 – RE – 08 CDP

As an international company employing 260 people, specialising in thermal solutions, we design, manufacture and market "tailored" high-tech applications for use in highly critical areas such as Nuclear, Aerospace, Defence, Semi-Conductors and other industrial areas.

Under the responsibility of the international sales manager, the project manager is responsible for controlling projects from the request for quotation up to industrialisation. In relation to the various persons involved in the company and customers, the project manager shall aim to ensure the commitments made are followed.

To do this, the project manager draws up the schedule at the time of the request for quotation, works out the project routing sheet, supervises optimum compliance with it, coordinates the various persons in the company involved and may also visit the customer to ensure the smooth running of their project.

As a general engineer, they will have good organisational capability and recognised inter-personal skills. The project manager will know how to direct resources into a project and give a positive impetus to the working group. They must be fluent in English and have a good sense of international culture. Making site visits to customers should be expected.

Send your application, quoting ref 16-RE-08 CDP / Apec - to the following email address:
